

Legendary LAKE MILLS

Why Legendary?

The legends swirl around Lake Mills like oak leaves in October. Are there really man-made structures on the bottom of Rock Lake? Does the civilization that created them pre-date the people of nearby Aztalan? Were these people pale skinned, fair haired and blue eyed as the Ho Chunk legends say? Are there effigy mounds shaped like a turtle and a headless man? Is there a "Loch Ness" type serpent in the lake?

So many questions, so few answers. But we think many legends makes Lake Mills a very interesting and special place.

Whether you live here or plan to visit, this map and our website will help you sort out the legends, find a great restaurant, a great shop or a local event - and create legends of your own.
